

# The NEW Zip HydroTap Touch Free Wave

## Reduce contact points in the workplace with 100% touch-free dispensing of filtered boiling, chilled and sparkling drinking water

Introducing the latest innovation from the creator of the world's most advanced drinking water system.

With an increased consideration around hygiene in the workplace, the new Zip HydroTap Touch-Free Wave helps you reduce contact points.

Smart infrared sensors provide a 100% touch-free, safe to use solution for staff to access instant filtered boiling, chilled and sparkling drinking water.

Zip HydroTap Touch Free Wave here [↔](#)

To dispense chilled water activate the right sensor

To dispense sparkling water activate the top sensor

To dispense boiling water you must activate both the left and back safety lock sensors

## How it works

Smart infrared sensors detect your hand when within 1.5-5cm of the tap. The LED light will illuminate when in range.

Once the hand is moved away from the sensor range the water flow will immediately stop.

The Zip HydroTap Touch Free Wave will not dispense if it is touched or grabbed.

To dispense boiling water the safety lock sensor at the back of the tap must also be activated.

## Why choose the new Zip HydroTap Touch Free Wave?

### Touch-free technology

Zip touch-free HydroTap Wave uses smart infrared sensors to activate the tap to dispense boiling, chilled and sparkling water, all without touching the tap.

### MicroPurity™ filtration

Thanks to our 0.2 micron MicroPurity™ filtration technology, the HydroTap offers 25 times more effective filtration than a standard water filter jug - making it the best of any instant filtered water tap in the world.

### Unique safety features

Boiling water is delivered smoothly with no spluttering and minimal steam, with a safety lock to prevent accidental dispensing.

### Auto-Diagnostics

An advanced auto-diagnostics system continuously monitors your HydroTap's performance and displays notifications via the main operating screen on the command centre.

### Air-cooled system

Our unique air cooled refrigeration system is 100% water efficient, unlike other water cooled systems.

### Power-Pulse™ Technology

Our innovative Power-Pulse™ technology saves energy by maintaining the boiling temperature.

# HydroCare

**Special offer**  
Up to 2 years free  
HydroCare

## Award winning service plans from Zip Water

HydroCare is the essential way to care for your Zip product and means we do all the hard work - it's another thing you can tick off your to-do list. Our variety of plans include services such as filter replacements, sanitisation, parts and labour, unlimited call-outs, an annual inspection, pre-scheduled planned services, refrigeration guarantee, system replacement and tailored limescale management, a particularly important element if you live in a medium to hard water area.

### Features and benefits

#### Fast and reliable

Zip has a fleet of over 90 fully trained, directly employed engineers based across the UK and Ireland.

#### Save money

HydroCare saves you money with every service while ensuring your product maintains its performance through its life.

#### Pure tasting water

Regular filter changes, sanitisation and planned services will ensure your Zip product continues to deliver pure-tasting water.

#### Peace of mind

Takes one thing off your to-do list with flexible, pre-scheduled services and filter changes.

#### Tailored and flexible

No matter what the water condition or usage, we have a HydroCare plan to match.

#### Expertise

With over 70 years' experience, Zip Water is the most trusted name in drinking water solutions.

**Up to 2 years free HydroCare when you buy the NEW HydroTap Touch Free Wave**

**Save over £1000!**
