

It's water. Refreshed.

# Zip HydroChill<sup>®</sup> price list

High-capacity chilled  
drinking water systems

# Reuse. Refill. Refresh.

The horrifying damage that plastic does to the environment has been well-publicised, with particular emphasis on the over-reliance on single-use plastic bottles.

In addition, a recent study has also discovered plastic particles in bottled water, opening up wider questions about the purity of bottled water and what health effects these particles may have on those ingesting them.

As the person responsible for providing drinking water solutions for the workplace or other commercial environments, you can have a direct impact on reducing that business' plastic waste. By saying no to one-use plastic bottles and choosing a filtered drinking water system with refillable glass bottles, you are doing your bit for the environment and the health of the user.

To demonstrate our commitment to helping businesses reduce their plastic waste, we've launched the Reuse Refill Refresh campaign. For more information, please visit [zipcommercial.co.uk/RRR](http://zipcommercial.co.uk/RRR)

# ZIP HydroChill is a new range of flexible, high-capacity, chilled water systems.

Using HydroChill completely removes the need for disposable, expensive plastic water bottles. So, unlimited hydration for employees and guests not only means a healthier, more productive workplace but a greener business.

#### Perfect for high demand

With the ability to cater for as much filtered chilled, ambient<sup>1</sup> and sparkling water as required, HydroChill offers a wide range of drinking water options, no matter the size of your organisation.

#### Eco-friendly

Great-tasting water, instantly, without an environmentally-damaging plastic bottle in sight.

#### Pure tasting

Thanks to Zip MicroPurity high capacity filtration, which filters out contaminants and ensures the water is as pure-tasting as possible.

#### A huge range of options

Counter-top or under-counter chillers, with the capability to provide up to 280 litres of ambient, chilled or sparkling water an hour from a single unit.

#### Wellness in the workplace

Staying hydrated at work not only helps employees stay healthy, it also positively impacts on productivity.<sup>2</sup> Drinking water regularly throughout the day helps you stay alert, improves concentration and means you're less likely to get stressed.

<sup>2</sup> 1% dehydration results in 12% drop in productivity. Source: Wasterlund et al 2004.

## The sustainable choice

# 373

Number of 750ml bottles of filtered chilled water that can be dispensed by Zip HydroChill per hour

<sup>1</sup>'Ambient' describes the temperature of the water where there is no additional heating or chilling to the incoming cold water supply. You may need to run the tap for a while to get it to a suitable temperature.

# HydroChill Counter-Top HC10

The HydroChill Counter comes with a HCF3 Filtration kit including Zip MicroPurity 93705 filter. All models are push-button dispense and Sparkling models feature a CO<sub>2</sub> regulator ready for installation.
