70 years of innovation

With unrivalled expertise in filtered boiling, chilled and sparkling water taps, Zip Water is known globally for being home to the world's most advanced drinking water systems.

Founded in Australia in 1947, we've always been innovators, advancing and perfecting our drinking water technology for decades. Today, we're proud to provide homes in over 70 countries across the world with the purest tasting, safest and cleanest water possible from our range of Zip HydroTaps.

Transforming the way people drink and cook forever, our advanced water filtration, functionality and cutting-edge technology leaves owners with a taste that's irresistible.

Start drinking more, while saving time and energy, and see the benefits to you and your family's wellbeing from your very first glass.

John Doumani, CEO Zip Industries

TEN REASONS WHY THE ZIP HYDROTAP IS

The world's most advanced drinking water system

#01

The widest choice of water options

Boiling, chilled and sparkling plus hot and cold water, any way you want it. We offer the widest choice of water options on the market. So, whether you're filling a cafetiere of coffee, a glass of cool, crisp drinking water or a sink of washing up, the choice is at your fingertips.

Filtered
Boiling

Filtered
Chilled

Filtered
Sparkling

Filtered
Ambient*

Unfiltered
Hot & cold

Ambient describes the temperature of the water where there is no additional heating or chilling to the incoming cold water supply. You may need to run the tap for a while to get it to a suitable temperature.

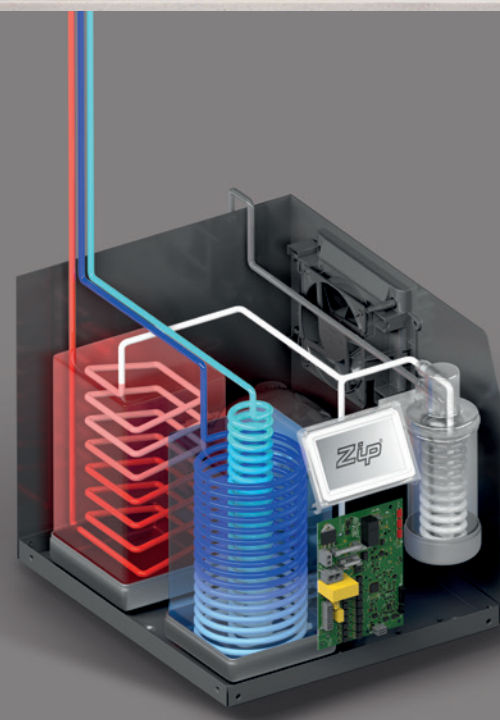

#02

Convenience at the touch of a button

Embodying functionality, the HydroTap is ideal for those who want systems that save time, reduce energy, are straightforward to use, simple to maintain and make life in the kitchen a whole lot easier.

Say goodbye to those stacks of bottled water taking up valuable fridge space and slow energy-guzzling kettles cluttering your countertops. Welcome the convenience of cooking, sterilising bottles and making tea or coffee with instant boiling water, not to mention the handiness of pouring a perfectly chilled still or sparkling glass of water whenever you need it.

With water any way you want it, the HydroTap truly is the ultimate kitchen must-have.

#03

The widest range of designs and finishes

Whether you opt for a classic chrome or stylish matt black, our range of timeless standard finishes have been designed to sit seamlessly in a wide range of kitchens, from contemporary to traditional.

To take your HydroTap from a kitchen appliance you can't live without to a striking design accessory, choose from one of our eight trend-led Platinum finish options.

Standard range

- Bright chrome
- Brushed chrome
- Gloss black
- Matt black

Platinum range

- Rose gold
- Brushed rose gold
- Gold
- Brushed gold
- Platinum
- Gunmetal
- Nickel
- Brushed nickel

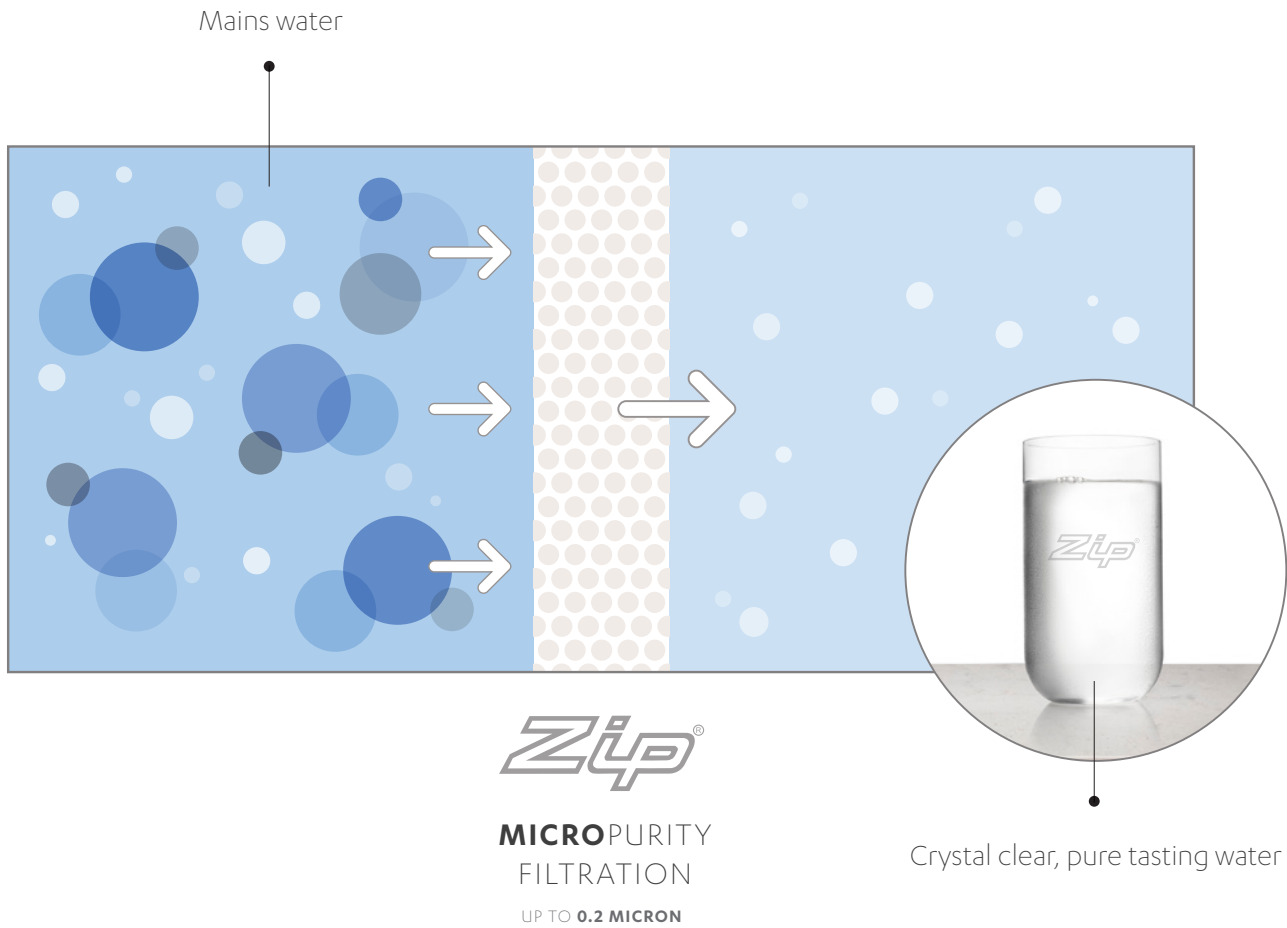

#04

Advanced filtration

Thanks to our technologically advanced MicroPurity filtration system,* which offers 25 times better filtration than a water filter jug, the Zip HydroTap delivers the purest tasting water from any instant filtered water tap in the world.

Unlike traditional carbon blocks, our filter combines carbon and sediment blocks into one cartridge. It not only removes dirt, bacteria and contaminants from the water that other systems may not, but also removes up to 97% of chlorine and 99.9% of microbiological cysts if present. And while the taste and odour of chlorine is removed, the fluoride is retained, making each and every glass more enjoyable and better for you.

* C4 models only

#05

Zip HydroTap owners drink more water

80%

of HydroTap owners drink more water

Whether you're striving to live a healthier lifestyle, or boost the wellbeing of your family, staying hydrated is key – a feat that has never been quicker or easier with Zip's HydroTap. In fact, our research shows that 80% of HydroTap owners drink more water than before.* With a taste that's truly irresistible, it's easy to see why.

Transforming ordinary tap water into the purest-tasting filtered chilled, sparkling and boiling water, you'll not only start drinking more, but also enjoy a host of mental and physical health benefits: from improved concentration, cardiovascular, muscle and joint health, right the way through to keeping your body cool, skin supple and cleansing toxins from the body.

*Research undertaken with 340 existing Zip HydroTap customers

#06

Smart innovative technology

Leading the way in both performance and functionality, Zip's fourth generation G4 technology is truly cutting-edge. Perfected over 70 years of development and innovation, HydroTap G4 is not only a breeze to maintain, but its exclusive features save energy, water and time.

**SMART.
SUSTAINABLE.
TECHNOLOGY.**

Air-cooled system

Our unique air-cooled refrigeration system is 100% water efficient, unlike water cooled systems.

Power-Pulse technology

Our innovative Zip Power-Pulse technology maintains stored boiling water to within 0.2°C of your set temperature, meaning you don't have to waste energy or time waiting for it to heat up.

Auto-diagnostics

Our advanced auto-diagnostics system continuously monitors your HydroTap's performance, and even provides a complete diagnostics history on demand.

#07

The sustainable choice

Sitting beneath a sleek and stylish tap, the HydroTap Command Centre houses the latest in advanced energy-efficiency technology.

20,000
bottles every second

Humans produce almost 20,000 plastic bottles every second but fewer than half are collected for recycling.

* Available for download from our website

#08

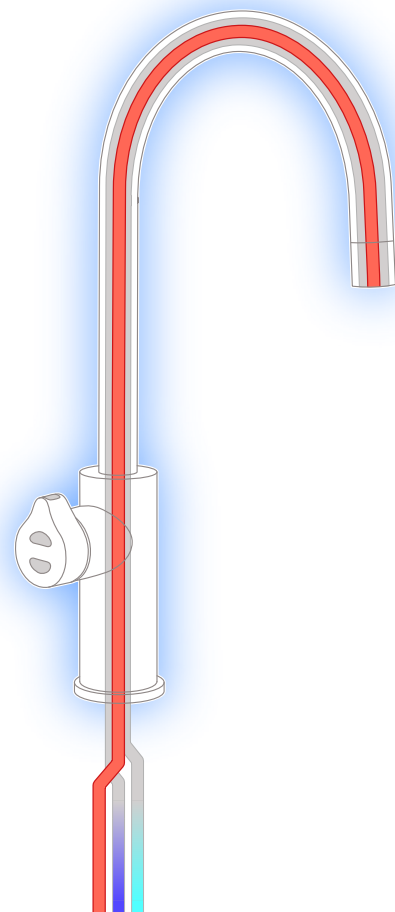

The safest instant boiling water tap

Boiling water safety lock

Unique safety features mean that little ones can't operate boiling water mode.

Cool touch tap

The HydroTap is cool to the touch and doesn't produce any spluttering steam.

#09

Dedicated support, warranty and aftercare

With 80 directly employed engineers ready to assist with any maintenance query and comprehensive **HydroCare®** service plans, we have the largest support network in the UK and Ireland, giving you prompt, headache-free efficient service.

Celsius range

All-in-One Celsius Arc

The ultimate in functionality, the All-in-One Celsius Arc is fitted over your sink and offers all five water types – filtered boiling, chilled and sparkling water, plus unfiltered hot and cold water – from a single tap. And it's all wrapped up in Zip's enduringly stylish Arc design.

Celsius Arc and Celsius Cube

Offering the same stylish designs, but with an added space-saving benefit, the Celsius Arc and Celsius Cube deliver your choice of filtered boiling or chilled or chilled and sparkling water, alongside unfiltered hot and cold water for your sink. So there's no need for a separate mixer tap.

Mixer Taps

Our Mixer Tap range has been created to match the exact shapes and finishes of the HydroTap Arc and Cube designs. This means you can choose a HydroTap with filtered boiling, chilled and sparkling water alongside a beautiful matching mixer tap that delivers unfiltered hot and cold water for washing up.

Both Mixer Tap models shown are mains fed, so require a hot and cold water feed.

Filters and CO₂

To guarantee that your HydroTap delivers pure-tasting, crystal clear water throughout its life, you'll need to ensure the filter is replaced on an annual basis.

Your Zip HydroTap will notify you when the filter replacement is due. The change filter light will flash white once per minute until the filter has been replaced, and the filter percentage will show 0% on the home screen of your command centre.

If you own a Zip product that dispenses sparkling water, you will also need to replace the CO₂ canister when it runs out.

Filters and CO₂ refills can be purchased directly from Zip Water UK, either online or via telephone.

A comprehensive guide on how to change a HydroTap filter is available on the Zip website.

zipwater.co.uk/faqs/how-to-change-the-filter

Do you live in a hard water area?

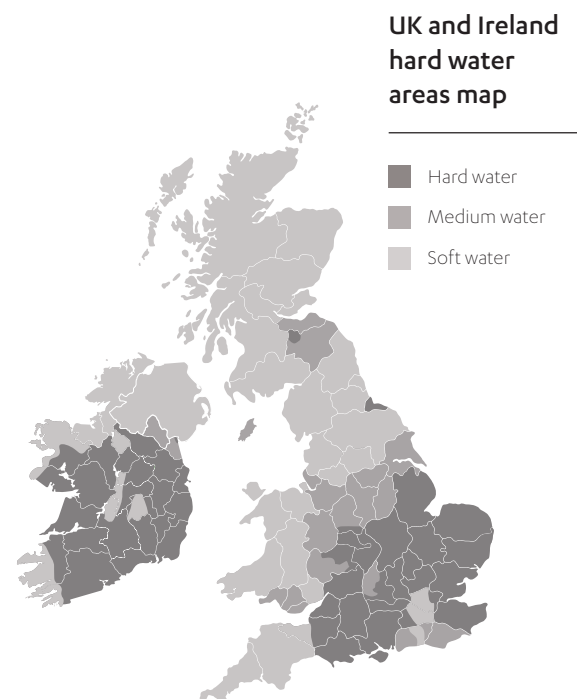

The benefits of scale filtration

You may have experienced limescale build-up in kettles due to hard water – a fact of life in the UK. This chalky deposit not only reduces the quality of hot drinks in terms of taste and appearance, it also decreases the appliance's performance and can ultimately result in breakdown.

To ensure your Zip product continues to operate at peak performance, we recommend scale filtration to reduce limescale. This is essential in areas where the water hardness level is above 180ppm. If you're not sure about the water hardness in your area, our team will be able to help.

The benefits of scale filtration:

- Improves the taste and appearance of your drinks
- Increases the longevity of your HydroTap
- Reduces maintenance costs
- Maintains the performance of your HydroTap in terms of flow rate and heat transfer.

Zip HydroCare® get the very best from your HydroTap

For those who want complete peace of mind we recommend HydroCare, our stress-free preventative service plan.

This simple, affordable package includes a yearly filter change, sanitisation and inspection by a trained Zip engineer. HydroCare eliminates all the stress that maintenance typically carries, ensuring your HydroTap not only remains in perfect condition, but operates at peak performance – and all for just a little more than you would pay to change the filter yourself.

Just like when you buy a car or invest in a new boiler, your HydroTap will benefit from a yearly service to maintain its high performance levels and to keep the water it dispenses tasting great.

HydroCare is your insurance against any breakdown that lies outside of the warranty, such as issues with limescale, saving you time and money in the long run.

The Zip HydroCare® service plan includes

- Annual inspection
- Annual replacement of all filters to a pre-agreed schedule
- Tailored scale management to maintain performance and longevity of your product
- Annual system sanitisation
- Technical support
- Full breakdown cover including parts and labour

Whether you're about to purchase a HydroTap or already have one installed, speak to one of our expert team on 0345 6 005 005 to ensure you're getting the very best out of your product.

Filters and consumables

Zip Water UK’s range of filters transform ordinary water into a form you will love. Our MicroPurity filtration technology is the most advanced on the market, producing crystal clear, great tasting water, free from odours and contamination including sediment, chlorine, heavy metals like lead, mircoplastics, bacteria and parasites (such as cryptosporidium and giardia).

We also recommend that those who live in a hard water area use a scale prevention filter to ensure the ongoing performance and longevity of your HydroTap. If you sign-up for HydroCare, this will be managed for you, along with annual filter changes and servicing. Find out more about HydroCare on page 39. Otherwise, you can contact us direct to order you filter replacements and we will deliver them direct to your door.

FL1100

Zip Scale Prevention Filter (for non-G4 models)

Scale filtration that reduces impurities greater than 1 micron, improving water taste and odour. Suitable for the HydroTap Base Model and HydroTap Base Model Celsius.

FL170

Zip Scale Prevention Filter (for G4 models)

Triple action limescale filtration cartridge for the HydroTap G4, essential in hard water areas to maintain product performance. Speak to our team if you’re unsure about the water hardness in your location.

93701

Zip 0.2 Micron Residential Filter (for G4 models)

Our high performance 0.2 micron MicroPurity filter gives you the safest, cleanest and purest tasting water available. Delivering 25 times better filtration than a standard water filter jug, it expertly removes contaminants greater than 0.2 microns.

ZT400

Zip Food Grade CO₂ Canister

If you have a HydroTap that delivers sparkling water, you will need to replace the CO₂ canister when it runs out. Order online or over the phone.

For all other filter requirements please get in touch with the Zip team.

HydroTap Base Model

The Zip HydroTap Base Model has all the style, function and convenience you'd expect from Zip. Providing instant filtered boiling and ambient water at the touch of a button, the Base Model is available with either an Arc or Cube style tap in our range of standard finishes, including bright chrome, brushed chrome and matt black.

Featuring a compact command centre that's the smallest in Zip's HydroTap range, the base model is also great for kitchens with limited under-counter space. Users will benefit from scale filtration, improving the taste and odour of the water they drink and maintaining the performance of their HydroTap.

There is also the option of the HydroTap Base Model Celsius, which delivers filtered boiling water, as well as unfiltered hot and cold water from one tap, eliminating the need for an additional mixer tap for washing up.

HydroTap G4

G4
SMART.
SUSTAINABLE.
TECHNOLOGY.

With filtered boiling, chilled and sparkling, and hot and cold water, any way you want it, the HydroTap G4 range offers the widest choice of water options available on the market.

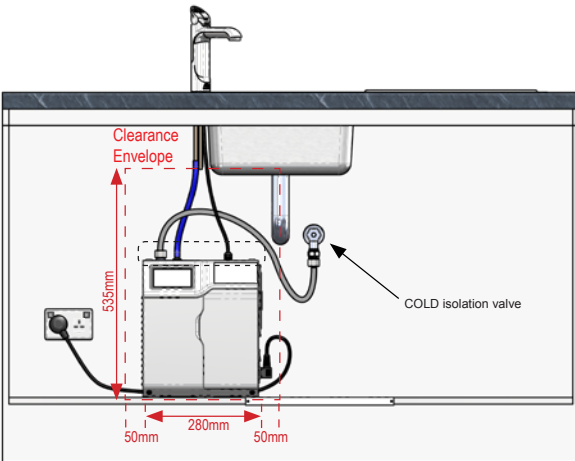

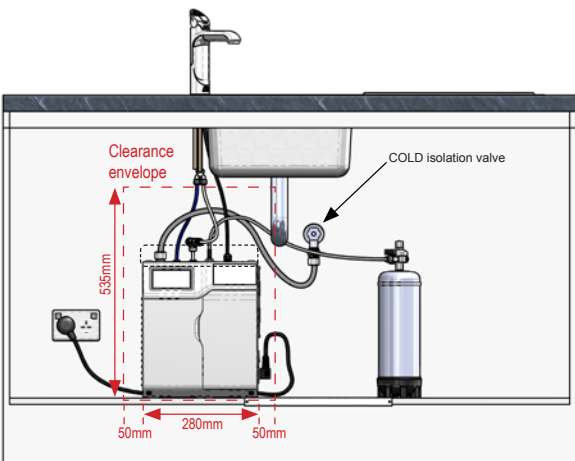

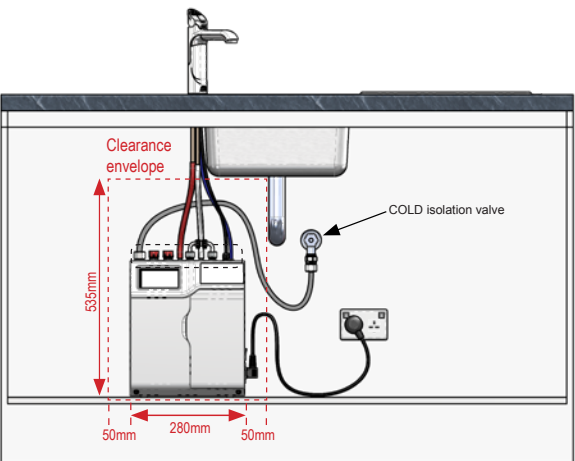

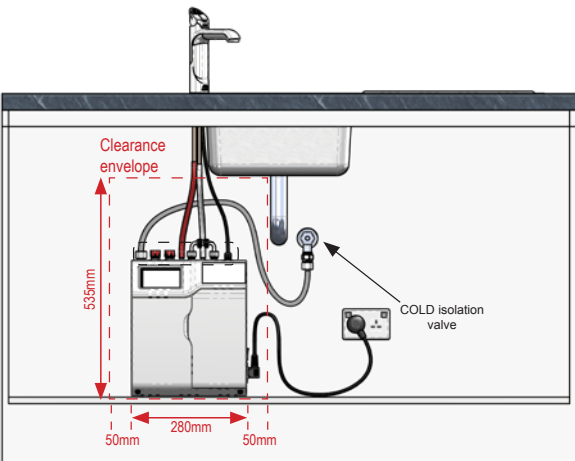

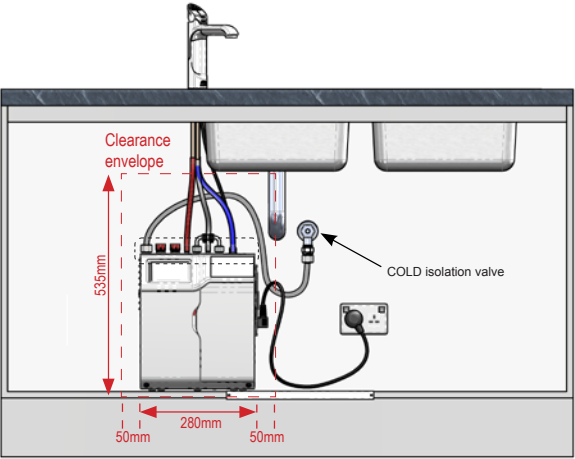

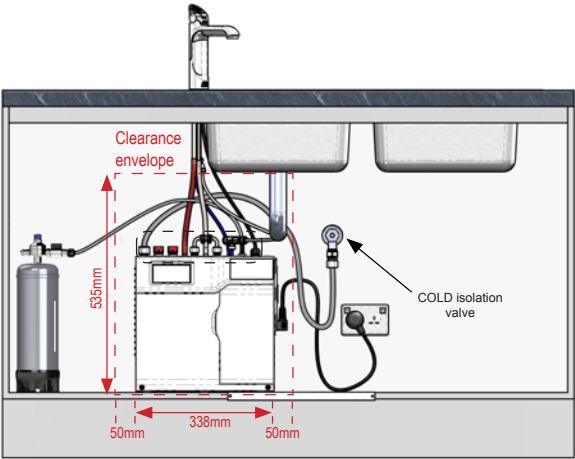

Enjoy world-leading filtration technology that's 25 times better than a water filter jug, giving you crystal clear, pure tasting water that's free from contaminants, bacteria, heavy metals and microplastics.

The HydroTap G4 also boasts a number of advanced energy efficiency and safety features, such as Power-Pulse technology, 'sleep when dark' mode, boiling lock and cool touch tap.

With a vast selection of designs and colours – as well as the option of fitting it over-sink or on-front – you'll be spoilt for choice and benefit from a tap that not only delivers on performance, but also looks at home in any design-led kitchen. Choose from our Platinum range of premium finishes, including rose gold, brushed rose gold, gold, brushed gold, platinum, gunmetal, brushed nickel and nickel.

A colour and finish
to complement
any kitchen

While our standard finish options are anything but standard, we know that the demand for a greater range of kitchen tap finishes has never been higher.

That’s why alongside our standard finishes, our Platinum range of finishes features eight additional trend-led choices. So whether your kitchen’s craving a Scandinavian-inspired rose gold, an industrial gunmetal grey or a classic platinum, you can now let your tap choice reflect your personal design preferences and even match the existing metal accents in your kitchen.
