

# Greedo Dining

A stylish Hampshire bistro channels a homely feel thanks to its new HydroTaps

**Location:** Hampshire

**Client:** Greedo Dining

**Sector:** Commercial

**Product:** HydroTap All-in-One Arc in bright chrome and HydroTap Arc in brushed gold

## The brief

- Edgy yet intimate aesthetic for a restaurant.
- Instant hot water for greater efficiency and better overall staff wellbeing.

## The solution

When interior designers at Moore Design Associates were called in to create a brand-new '1950s Poland' style restaurant, they already had ideas for how to create the perfect solution. Needing to be edgy and contemporary, while also personable and relaxed, the designers decided to specify two HydroTaps so that it could feel like a home away from home.

## The results

“For the staff’s use, we put in a HydroTap All-in-One Arc in chrome upstairs in the restaurant. The lower floor features a HydroTap Arc in brushed gold, dispensing filtered chilled and sparkling water, so that customers can serve themselves drinks straight from the tap. This is great for channelling that feeling like you’re at home.”
