

# Kidney Research

Kidney Research UK headquarters have enjoyed the benefits of their “life-changing” HydroTap

**Location:** Peterborough

**Client:** Kidney Research UK

**Sector:** Commercial

**Product:** HydroTap Classic in bright chrome

## The brief

- Charity kitchen refurbishment with staff wellbeing in mind.
- Quick, great tasting drinking water to boost productivity.

## The solution

When Zip found out the team at the country’s leading charity dedicated to kidney research, Kidney Research UK needed a new staff kitchen, they got in touch to donate a brand new HydroTap Classic to provide instant filtered chilled and boiling water, installed free of charge.

## The results

“We couldn’t have been more delighted when Zip Water very generously gifted us a HydroTap. It’s made a staggering difference to the office. We don’t have to waste time waiting for the kettle and everyone is keeping hydrated, which we know is essential when you want to be productive and healthy. It is the perfect addition to the new, bigger kitchen area.”

Anne-Marie McCarthy, Finance Director  
Kidney Research UK
