

Chilly's Bottles

Chilly's Bottles chooses Zip for its head office to continue the company's goal to cut out single-use plastic

Location: London

Client: Chilly's Bottles

Sector: Commercial

Product: HydroTap All-in-One Classic in bright chrome

The brief

- To encourage hydration among staff.
- To continue cutting down on single-use plastic.

The solution

Searching for a tap that provided easy access to highly filtered water, Chilly's opted for a Zip HydroTap All-in-One Classic in bright chrome for their office. As a mains-fed system offering an incredible five water types, the All-in-One completely eliminates the need for single-use plastic bottles - a sustainable initiative both Chilly's and Zip share.

The results

"Being able to have three different types of filtered water all from one tap is fantastic. It gives our employees everything they might need. Plus, we don't have to wait for a kettle to boil and as it's installed over the sink it saves a lot of counter space in the kitchen area too. In particular, the sparkling water has proved to be very popular and with unfiltered hot and cold water, which is perfect for washing up, we have absolute flexibility."
