

Hippodrome

Staff at London's Hippodrome keep safety front of mind with the new touch-free HydroChill HC03

Location: London

Client: Hippodrome

Sector: Commercial

Product: HydroChill HC03

The brief

- A safe way for staff to hydrate while being able to meet social distancing requirements.

The solution

A simple to install, cost effective solution, the HydroChill HC03 was chosen to ensure staff could hydrate safely with great tasting filtered chilled and ambient drinking water. Thanks to its clever touch-free technology and innovative nano silver surface coating, users don't have to worry about cross-contamination every time it is used.

The results

"We've had a lot of great feedback from the staff since the installation - as with the other HydroChill models, people really like the taste of the water produced. The product is very easy to use and is capable of keeping up with the high demand. It also allows us to ditch expensive plastic bottled water which is not good for the environment... and also needs to be stocked up all the time!"

Mike Haydon, Food and Beverage Director
Hippodrome (London)
