

Time Inc. UK

Time Inc. UK install 14 Zip HydroTap Classics into breakout areas at their new London HQ

Location: London

Time Inc.

Client: Time Inc. UK

Sector: Commercial

Product: HydroTap Classic in bright chrome

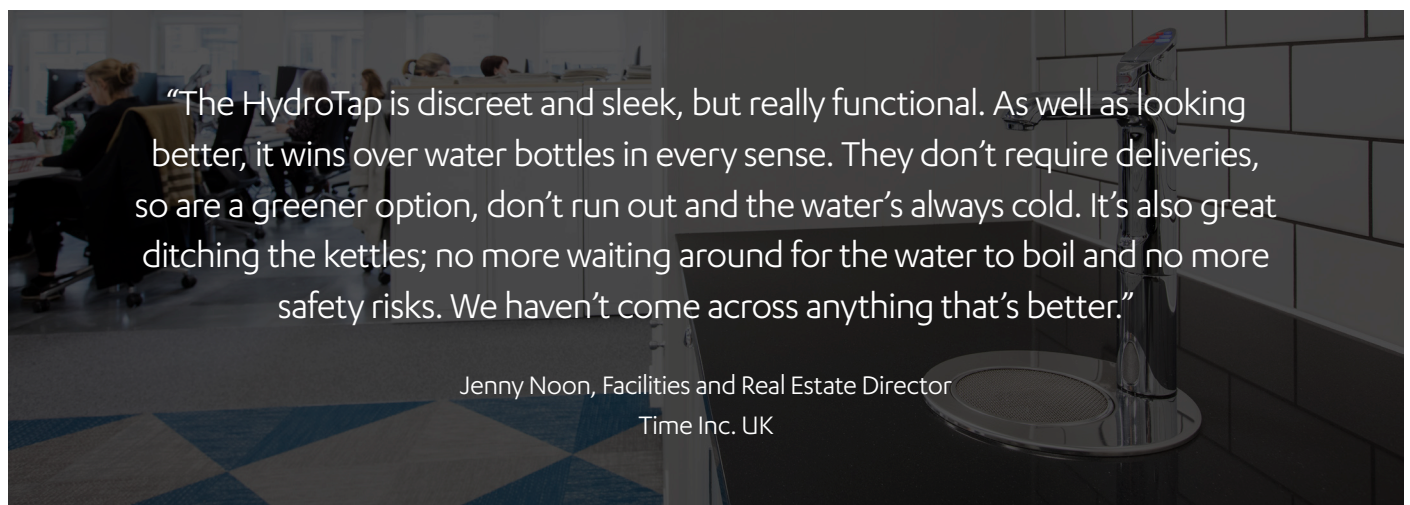

The brief

- A high performance drinking water solution to keep employees hydrated.

The solution

As of 2017, 19 commercial Zip HydroTap Classics - dispensing filtered boiling and chilled water - keep 1,300 employees hydrated across six of the company's locations. That's why, when it came to opening a new office, the efficiency, safety and reliability of the HydroTap again made it the tap of choice.

The results

"The HydroTap is discreet and sleek, but really functional. As well as looking better, it wins over water bottles in every sense. They don't require deliveries, so are a greener option, don't run out and the water's always cold. It's also great ditching the kettles; no more waiting around for the water to boil and no more safety risks. We haven't come across anything that's better."

Jenny Noon, Facilities and Real Estate Director
