Offices and leisure centres get a Zip refresh

Location: Wiltshire

Client: Wiltshire Council

Sector: Commercial

Product: HydroTap Classic in bright chrome

The brief

- New reliable, efficient and easy-to-use drinking water systems to replace older generation HydroTaps.
- Needs to be able to meet hot beverage demands of all employees at the same time as fitting energy saving criteria.

The solution

After years of faithful service from their older generation HydroTaps, Wiltshire Council decided to upgrade to the latest models, citing the improved environmental ratings and filtration as an added bonus. A grand total of 23 Zip HydroTap Classics were installed in five public authority buildings, of which three are office hubs and two leisure centres.

The results

“These taps are so convenient - kettles simply can’t cut it anymore in a busy workplace. HydroTaps are essential when servicing the volume of staff we have here day-to-day.”

Philip McMullan, Facilities Manager
Wiltshire Council
