

# Todwick Primary School

Todwick Primary School is a local authority school located in Sheffield. With limited budgets, Site Manager, Mark Haywood, needed reliable, energy-efficient solutions to meet the school's varied water needs across staff and student areas. Zip Water provided a one-stop solution, delivering premium products, expert installation, and dependable service in an all-in-one offering.

**Location:** Sheffield

## Todwick Primary School

**Client:** Todwick Primary School

**Sector:** Education

**Product:** Zip HydroBoil

### The brief

Facing government budget cuts of up to £40,000, Todwick Primary School needed a reliable, energy-efficient alternative to multiple kettles, which were proving slow and inefficient during staff's short breaks. With four kettles running each breaktime, staff became frustrated with the limited downtime between lessons. The school also sought a low-maintenance solution that aligned with its sustainability and ESG goals, without disrupting daily operations.

### The solution

Site Manager Mark Haywood, already familiar with Zip Water's reliability, chose the WRAS-approved HydroBoil for its safety, efficiency, and durability – likening it to “an Audi: high quality and worth the investment.” Installed during the summer break, the HydroBoil now provides instant boiling water in the staffroom, reducing wait times and improving staff wellbeing. Mark also opted for three InLine heaters, as well as Zip Varipoint units in classrooms, and an AquaPoint, delivering efficient hot water across the school. Mark has full confidence in the system's long-term performance and is already planning to install another HydroBoil unit in a future nursery expansion.

### The results

“I was particularly drawn to the HydroBoil as a safe option for the school; the bright red lever is a great feature to help avoid scalding and ensure safety. Having used Zip products in a previous role, I knew I could rely on them for quality, eco-efficiency and performance, so it was an easy decision to call on Zip Water again.”
