

# Flexible Workspace by Grosvenor

Flex by Grosvenor is a real estate collective that manages every aspect of outstanding commercial properties for its clients. Its team works closely with landlords and building owners to activate exceptional experiences for their tenants, through design, technology and hospitality.

**Location:** London

**Client:** Flexible Workspace by Grosvenor

**Sector:** Offices & workplaces

**Range:** Zip HydroTap for Work

## The brief

The working environments that Flexible Workspace by Grosvenor creates are nothing but luxurious. With a 'private members club' appeal, every detail needs to be considered and every single appliance chosen has to meet the very highest of standards. So, when Grant Powell – Co-Founder and CEO of Flex by Grosvenor – was on the lookout for an instant filtered water tap for a new collection of flexible workspaces in Mayfair, he knew he needed a superior drinking water system. One that offered unrivalled functionality, pure taste and flawless design. Luckily, he had to look no further than Zip.

## The Solution

Grant chose to specify a number of our 5th generation HydroTap Classic Plus' in bright chrome, all installed on raised fonts. This allows for the taps to be positioned away from the sink, in their own dedicated 'tea points' within the kitchen spaces. The modern design of the Classic Plus tap marries seamlessly with the bold marble kitchen areas and sits confidently alongside other top-end appliance brands. Delivering instant filtered boiling, chilled and sparkling drinking water the HydroTap offers a versatility that clients will expect from a workspace of this high standard. From that perfect green tea to a refreshing tumbler of fabulously fizzy water, all tenants, clients and visitors have immediate access to the very best tasting drinking water.

## The results

"We wanted only the best products for our high-end office destinations, and Zip HydroTap has proved to be the perfect match. On top of looking sleek enough to sit comfortably in the design of the spaces, it delivers beautifully chilled drinking water and hot water at the perfect temperature in an instant - a must have for our busy clients. The fact we can install on a font has also been an added bonus, as we have been able to create easily accessible drinking water points away from the sink. It's a sophisticated product, and we look forward to installing HydroTaps in our other office locations."

Grant Powell, Co-founder and CEO
